The 2021 IEEE International Conference on Mechatronics and Automation (ICMA 2021) will take place in Takamatsu, Kagawa, Japan from August 8 to August 11, 2021. Due to the influence of the Covid-19 pandemic, the IEEE ICMA 2021 will be held in a hybrid format, including simultaneous on-site and cloud meetings. Located in Takamatsu, agawa, Japan. Takamatsu is a small city located at Sikoku which is the smallest island in 4 main islands of Japan. Shikoku contains a lot of temples including Zentsu-ji, where one of the most famous Buddhists, Kukai, was born.

As the host city of ICMA 2021, Takamatsu not only provides the attendees with a great venue for this event, but also an unparalleled experience in the Japanese history through several historical architectures. You are cordially invited to join us at IEEE ICMA 2021 in Takamatsu. The objective of ICMA 2021 is to provide a forum for researchers, educators, engineers, and government officials involved in the general areas of mechatronics, robotics, automation and sensors to disseminate their latest research results and exchange views on the future research directions of these fields.

The topics of interest include, but not limited to the following:

- Intelligent mechatronics, robotics, biomimetics, automation, control systems,
- Opto-electronic elements and Materials, laser technology and laser processing
- Elements, structures, mechanisms, and applications of micro and nano systems
- Teleoperation, telerobotics, haptics, and teleoperated semi-autonomous systems
- Sensor design, multi-sensor data fusion algorithms and wireless sensor networks
- Biomedical and rehabilitation engineering, prosthetics and artificial organs
- Control system modeling and simulation techniques and methodologies
- AI, intelligent control, neuro-control, fuzzy control and their applications
- Industrial automation, process control, manufacturing process and automation
